

# Roadshow by Endress+Hauser

The Showtruck is coming!

## What the Endress+Hauser Showtruck has to offer

- The Showtruck is a mobile booth, which comes with more than 45 m<sup>2</sup> exhibition space directly to your premises. You and your employees can get a comprehensive overview of the latest products, solutions and services from Endress+Hauser without having to visit a fair.
- The Showtruck features a variety of working exhibits and a multimedia terminal which shows the complete Endress+Hauser portfolio together with typical installations.
- You benefit from a customized presentation by our application consultants on site. They are available for personal discussions, to answer your questions and to give an individual explanation of all functions.
- Live demonstrations and individual consultations precisely address your needs and requirements. They support you in the training of your employees, enabling them to increase their technical competence.

## Dive into the depths of the technology

**Latest devices for each field of activity** Whether pressure, temperature, analysis, level or flow measurement - the exhibits demonstrate how things work in a transparent and understandable way. Nine LED displays and several touchpads with explanatory text, graphics and videos lead you into the depths of technology.

**Clear overview of the devices for your industry** Models for chemicals, water and wastewater, food and life science demonstrate our know-how as full range supplier.

**Your added value always in view** Exhibits on services and solutions as well as a centrally placed multimedia terminal complete our presentation.

# How to book the Showtruck

Tell your Endress+Hauser contact person when you would like us to come. After consultation with the Showtruck tour planners, you will be offered a presentation date. The Endress+Hauser roadshow is free of charge.

The Endress+Hauser roadshow team looks forward to your visit!
